JUNIOR STEAM

JR. STEAM Club Description

This engaging program is designed to introduce younger children to STEAM concepts, programming, and computer science in a fun and interactive environment. TechLabs aims to create positive experiences that ignite children's interest in STEAM while developing essential future skills.

New project for 2026/2027

Theme 1: "My First Robots" - August 2026 - February 2027

TechLabs has developed new materials, kits, and content specifically for our youngest learners who are still developing reading and dexterity skills. We emphasize screen-free, interactive projects with a strong kinetic element to maintain engagement. Our new VEX 123 robots facilitate the exploration of math and reasoning skills through enjoyable team-based games. Participants will also use VINU robots to learn sequencing skills while making music, and exploring daily challenges.

Skills children will gain:

- Problem-solving and critical thinking
- Creativity and innovation
- Hands-on and cooperative learning in groups

Tuesday 16:00-17:00
